

Multi-Leaf Trailer Suspension Spring

This multi-leaf spring is designed for trailer suspension systems. It is constructed from high-strength steel, providing progressive load capacity and improved ride characteristics.

Product Overview

Professional Trailer Suspension Solutions

These multi-leaf trailer suspension springs are engineered with over 58 years of manufacturing expertise. Designed for durability and performance, they provide a progressive load capacity and reliable ride characteristics essential for heavy-duty transport. Each unit is constructed from high-strength steel alloys to ensure long-term stability and resistance under demanding operating conditions.

Technical Specifications

Material Specifications	SUP7, SUP9, SUP11
Model Identifier	HU28-SF-02-2013

Commercial Terms

Accepted Payment Methods

- L/C
- T/T

Minimum Order Quantity	5 Tons
Delivery Lead Time	10-25 days

Supply Capacity

Supply Capacity

25000 Tons

Min Annual Capacity

30000 Tons

Max Annual Capacity
