Product Overview

Heavy-Duty Suspension Solutions

This multi-leaf spring assembly is engineered for superior vehicle stability and high load-bearing capacity. Constructed from multiple layers of high-strength steel, the graduated design ensures a progressive spring rate for improved ride quality. Each unit is built for durability under demanding conditions and includes secure mounting points for reliable axle integration.

Technical Specifications

Construction Material	High-strength steel
Surface Finish	Corrosion-resistant black finish
Design Features	Multi-leaf design, Center bolt alignment, U-bolt attachment points, Progressive spring rate

Available Models
