

Multi-Level Screwless Terminal Block

This multi-level terminal block allows for easy insertion and removal of wires without screws. It is ideal for connecting wires in control panels, machinery, and other industrial equipment.

Product Overview

Professional Multi-Level Screwless Terminal Block

This high-performance multi-level screwless terminal block, model JK242-500, offers a space-saving and efficient solution for secure wire termination in industrial environments. Designed for easy installation, the screwless mechanism allows for rapid wire insertion and removal, significantly reducing assembly time for control panels and machinery. Built to withstand demanding conditions, it provides reliable electrical connectivity with a broad operating temperature range.

Electrical Ratings

Rated Current

15 A

Rated Current

| | |
|----------------------|----------------|
| Rated Voltage | 300 V |
| Insulation Impedance | 5000M © / 1000 |
| Withstand Voltage | AC2000V / 1Min |

Technical Specifications

| | |
|-----------------------|-------------|
| Terminal Spacing | 5 mm |
| Wire Diameter Range | 12~28 AWG |
| Operating Temperature | -33 to +120 |

Configuration

| | |
|--------------|--|
| Pole Number | 2P to 30P |
| Key Features | Screwless, Multi-Level, Space-saving, Tool-less Installation |
