Product Overview

Versatile Cutting Performance

This multi-purpose brazed diamond blade is engineered for high-efficiency cutting across a diverse range of construction materials, including concrete, asphalt, stone, tile, and masonry. Its robust steel core combined with brazed diamond segments ensures a strong bond for aggressive, long-lasting performance. Designed for versatility, the blade operates effectively in both wet and dry conditions, featuring cooling slots to manage heat buildup and minimize vibration during operation.

Technical Specifications

Compatible Materials

- Concrete
- Asphalt
- Stone
- Masonry
- Tile

Tool Compatibility

Angle Grinders • Circular Saws

Cutting Applications

Wet Cutting, Dry Cutting

Design Features

Key Features

- Brazed diamond segments for durable bond
- Durable steel core
- Integrated cooling slots
- Vibration reduction design
