

Multi-Needle Cylinder Bed Chainstitch Sewing Machine

This high-speed cylinder bed machine is designed for double chainstitch operations. It features a multi-needle configuration, ranging from 2 to 12 needles, making it suitable for diverse stitch patterns.

Overview

Versatile Cylinder Bed Performance

This high-speed cylinder bed double chainstitch machine is engineered for demanding industrial environments. Its specialized cylinder bed design allows for seamless sewing on tubular and curved items, making it an essential tool for complex garment assembly. With a multi-needle configuration ranging from 2 to 12 needles, it offers exceptional flexibility for various stitch patterns and fabric types, ensuring both productivity and consistent, durable chainstitch performance.

Technical Specifications

Needle Configuration	2 to 12 needles
Machine Type	Cylinder Bed Double Chainstitch
Model Number	TY-VC008

Compliance & Features

Primary Applications

- Tubular items
- Curved items
- Versatile fabric sewing

Compliance	CE
