

# Multi-Needle Overlock Sewing Machine

This high-speed, multi-needle sewing machine is designed for overlock and safety stitch operations. It features adjustable differential feed, an automatic lubrication system, and compatibility with various fabric types.

## Overview

### High-Performance Industrial Sewing

This high-speed, multi-needle sewing machine is engineered specifically for demanding overlock and safety stitch operations. Designed for versatility, it features an automatic lubrication system and adjustable differential feed to handle a wide range of fabric types with precision. It is an ideal solution for large-scale manufacturing environments in the garment, shoe, and accessory industries, offering durable construction for consistent, high-quality results.

## Technical Specifications

Machine Type	Multi-Needle Overlock
Key Features	High-Speed, Automatic Lubrication, Adjustable Differential Feed, Safety Stitch

## Applications

### Primary Applications

- Garment Manufacturing
- Shoe Production
- Accessory Manufacturing
- Seaming
- Hemming
- Edge Finishing
