

Multi-Outlet Power Strip with USB Charging

This power strip features multiple AC outlets and USB charging ports. It is designed for convenient power distribution and device charging.

Product Overview

Versatile Power Solution

This multi-outlet power strip is engineered for efficient power distribution and device charging in professional or home office environments. Featuring a combination of standard AC outlets and dedicated USB-A charging ports, it supports a variety of electronic devices including smartphones, tablets, and computers. The unit is built with a durable, low-profile design to minimize clutter while providing reliable connectivity.
