

Multi-Pair Communication Cable

This is a multi-pair cable used for telephone communications. It features twisted pairs of insulated copper wires and a foil shield.

Product Overview

Professional Telecommunications Cabling

This multi-pair communication cable is engineered for robust performance in complex system cabling applications. Available in configurations ranging from 20 to 200 pairs, it offers flexibility for large-scale telecommunications infrastructure. The construction utilizes high-quality copper conductors and durable insulation materials to ensure reliable signal transmission.

Physical Properties

Insulation Material

- PE
- PVC

Conductor Material

Tinned Copper, Stranded Bare Copper, Solid Copper

AWG Range

24-20 AWG

Technical Specifications

Shielding Type

Shielded • Unshielded

Jacket Composition

- Lead free PVC
- Non-migration PVC

Pair Count Range

20 to 200 pairs

Features

Specialized Features

PET Foil, Rip Cord
