

Multi-Pair Telecom Cable with Copper Conductors

This multi-pair telecom cable features 56 pairs of 24 AWG solid copper conductors. The cable is suitable for various voice and data communication applications.

Product Overview

High-Performance Multi-Pair Telecom Cable

This multi-pair telecom cable is engineered for reliable voice and data communication applications. Featuring 56 pairs of 24 AWG solid copper conductors, it ensures consistent signal integrity across your network infrastructure. The cable is protected by a metallic shield against EMI/RFI interference and encased in a durable PVC jacket for long-lasting performance in various environments.

Technical Specifications

Conductor Material	Solid Copper
Conductor Gauge	24 AWG
Total Pairs	56
Insulation Material	Polyethylene

Construction & Shielding

Shielding	Metallic Shield
Jacket Material	PVC
Protection Features	EMI Protection, RFI Protection, Durable Jacket

Identification

Model Identifier	SYT+1 56X24AWG24
