

Multi-Purpose Construction Vehicle with Excavator and Blade

This multi-purpose construction vehicle is designed for various construction and maintenance tasks. It features a front-mounted blade for grading and a rear-mounted excavator for digging.

Overview

High-Performance Multi-Purpose Engineering Vehicle

This versatile construction vehicle is engineered for rapid response and high-efficiency operations. Combining a powerful 4-in-1 bucket system with a rear-mounted excavator, it offers 21 distinct operating functions to handle diverse site requirements. Designed with a focus on speed and mobility, it is uniquely qualified for road construction, emergency rescue missions, and disaster relief efforts.

Performance

Maximum Speed

90 km/h

Max Speed

Equipment & Capabilities

Bucket System	4-in-1 bucket with back bucket
Operating Functions	21

Applications

Primary Applications	Road Construction, Emergency Rescue, Disaster Relief, Road Maintenance
----------------------	--

Compliance

Road Traffic Compliance	Yes
