

Multi-Purpose Welding Machine

This multi-purpose welding machine is designed for various welding applications. It features adjustable settings for precise control over welding parameters, including current and voltage.

Product Overview

Professional Versatility

The Multi-Purpose Welding Machine is engineered for professional industrial applications requiring precision and adaptability. Featuring an intuitive interface and adjustable control settings, it allows for seamless management of current and voltage parameters. Its robust construction ensures long-term reliability in demanding environments, while the compact, portable design makes it an ideal solution for both workshop and on-site projects.

Technical Specifications

Maximum Current

160 A

Rated Current

Supported Processes

MIG, PULSE TIG, MMA

Features

Key Capabilities

- Adjustable current and voltage settings
- Integrated welding output monitor
- Compact and portable form factor
- High-durability industrial construction
