

Multi-Speed Bicycle Freewheel Cassette

This multi-speed freewheel cassette is designed for bicycles. It features stacked sprockets of varying sizes, allowing for multiple gear ratios.

Product Overview

High-Performance Drivetrain Component

This multi-speed bicycle freewheel cassette is a precision-engineered drivetrain component designed for seamless power transfer. It features a series of high-quality steel sprockets arranged in varying sizes to facilitate smooth transitions across multiple gear ratios. Durable and reliable, this cassette is the ideal solution for upgrading or replacing components on the rear wheel hub of a bicycle.

Technical Details

Material Composition	Steel
Surface Finish	Silver
Component Category	Drivetrain, Transmission, Freewheel
Mounting Location	Rear wheel hub
