

Multi-Speed Bicycle Freewheel Cassette

This multi-speed freewheel cassette is designed for bicycle drivetrains. It allows riders to select different gear ratios and coast without pedaling.

Product Overview

High-Performance Freewheel Cassette

This multi-speed bicycle freewheel cassette is precision-engineered to enhance drivetrain efficiency across varied cycling terrains. Featuring a durable steel construction, the stacked sprocket design allows for seamless gear ratio selection to optimize pedaling performance. The integrated freewheel mechanism ensures reliable coasting capabilities, making it a robust component for professional and recreational cycling applications.
