

Multi-Speed Household Fan with Exhaust

This electrical fan is designed for both cooling and ventilation purposes. Constructed from durable plastic materials, it offers multiple speed settings controlled via buttons on the top.

Product Overview

Versatile Airflow Solution

This multi-speed household fan is engineered for both cooling and ventilation, making it a dual-purpose appliance for residential environments. It features an optimized blade design for efficient airflow, housed behind a circular safety grill for enhanced protection. With its stable, decorative base and durable plastic construction, this fan combines practical performance with a design suitable for modern living spaces.

Technical Specifications

Design Features

Safety Grill • Stable Base • Multi-Speed

Construction Material	Durable Plastic
Control Interface	Top-mounted buttons
Primary Functions	Cooling, Ventilation, Exhaust
