

Multi-Speed Mountain Bicycle with Front Suspension

This mountain bicycle is equipped with a front suspension fork and disc brakes. It features a multi-speed drivetrain and knobby tires for enhanced off-road traction.

Overview

Built for Trail Performance

This multi-speed mountain bicycle is engineered for versatility and control on varied terrain. Featuring a robust front suspension fork and reliable disc brakes, it provides the necessary stability and stopping power for off-road adventures. The drivetrain, equipped with a triple chainring crankset and rear derailleur, offers a wide range of gears to handle both steep climbs and fast descents.
