

Multi-Stage Air Purifier with Digital Display

This air purifier is designed to improve indoor air quality. It utilizes a multi-stage filtration system with HEPA and activated carbon filters to eliminate airborne particles and odors.

Product Overview

High-Efficiency Air Purification

This multi-stage air purifier is designed to significantly improve indoor air quality for professional and residential environments. It utilizes a comprehensive filtration system, including a pre-filter, HEPA filter, and activated carbon filter, to effectively capture dust, pollen, smoke, and odors. With its integrated digital display and remote control, users can easily monitor air quality levels and adjust settings for optimal performance.

Filtration System

Filtration Stages

- Pre-filter
- HEPA filter
- Activated carbon filter

Target Contaminants

Dust, Pollen, Smoke, Odors, Airborne particles

Features & Controls

Control Methods

Digital Display • Remote Control

Operational Features

- Adjustable fan speeds
- Timer function
- Portable design with caster wheels
