

Multi-Stage Air Purifier with Humidifier

This air purifier features a multi-stage filtration system with HEPA and activated carbon filters to remove dust, pollen, smoke, and odors. Designed for small to medium-sized rooms, it includes a water reservoir for humidification and operates quietly.

Product Overview

Advanced Air Purification and Humidification

This multi-stage air purifier is engineered to significantly improve indoor air quality for small to medium-sized spaces. By combining a comprehensive filtration system with integrated humidification, it effectively removes common airborne pollutants such as dust, pollen, pet dander, and smoke while maintaining optimal moisture levels. Designed for quiet operation, it is an ideal solution for creating healthier environments in bedrooms, living rooms, and office areas.

Filtration System

Filtration Technology

- Pre-filter
- HEPA filter
- Activated carbon filter

Targeted Pollutants

Dust, Pollen, Pet Dander, Smoke, Odors

Key Features

Smart Functionality
