

# Multi-Stage Air Purifier with Timer

This air purification device is designed for indoor air quality improvement. It features a multi-stage filtration system to remove dust, pollen, and other airborne particles.

## Overview

### Professional Indoor Air Solution

This advanced air purification device is engineered to significantly improve indoor air quality by effectively removing dust, pollen, and various airborne particles. Designed for versatility, it utilizes a multi-stage filtration system suitable for both home and office environments. The unit offers user-friendly operation through a remote control and integrated timer functions, ensuring clean air management is both efficient and convenient.

## Technical Specifications

### Timer Presets

- 1H
- 2H
- 4H

### Model Number

GL-2108

## Features

### Control Options

Remote Control • Panel Controls

### Status Indicators

- Filter Status
- Operating Mode

### Filtration Type

Multi-stage, Particle Removal

## Usage

### Recommended Use

Home, Office
