

Multi-Stage Centrifugal Water Pump

This water pump features a multi-stage centrifugal design, providing high pressure and flow rates. Constructed with durable materials, it ensures long-lasting performance and reliability.

Product Overview

High-Efficiency Multi-Stage Centrifugal Solution

This multi-stage centrifugal water pump is engineered for versatile liquid transfer in domestic, civil, and industrial environments. It provides reliable performance for well-water supply, irrigation systems, and general pressure boosting. Designed with a focus on durability and efficiency, the pump features a robust build that ensures long-lasting operation across various demanding applications.

Operating Conditions

Maximum Fluid Temperature	40 °C
Maximum Sand Content	0.25 %

Technical Specifications

Power Supply Configurations

- Three-phase: 380V-415V/50Hz
- Single-phase: 220V-240V/50Hz

Motor Construction	Rewindable
--------------------	------------

Compliance and Support

Warranty Period	1 year
-----------------	--------

Application Areas

Typical Applications	Well Supply, Reservoirs, Domestic Use, Civil Applications, Industrial Use, Garden Irrigation
----------------------	--
