

Multi-Stage Mineral Water Purifier Pot

This multi-stage mineral water purifier pot filters tap water through ceramic, mineral stones, and activated carbon. It removes impurities, chlorine, and odors while adding essential minerals.

Product Overview

Clean, Mineral-Rich Water

This multi-stage mineral water purifier pot provides a convenient solution for accessing clean drinking water in homes, offices, and schools. Utilizing a 5-stage super filtration system with ceramic filter balls, it effectively reduces impurities from tap water while enriching it with minerals. The system is designed for ease of use, requiring no electricity or plumbing, and features a user-friendly faucet for direct water dispensing.
