Overview

Versatile Power Connectivity

This multi-standard electrical outlet is engineered for reliable power distribution in both residential and commercial environments. Featuring a robust 2+3 pin configuration, it is designed to accommodate various international plug standards for maximum compatibility. Constructed with fire-retardant materials and high-quality copper components, this unit ensures long-term safety, durability, and efficient performance for your electronic devices.

Place of Origin	Guangdong, China
Model Number	R9PHZ/13

Technical Specifications

Performance Metrics

250 VAC

Rated Voltage

16 A

Rated Current

Durability & Lifecycle

Metric	Cycles
Switching	40000
Plugging	5000

Safety Features	Fire Retardant, Silver Contact, Copper Terminals
-----------------	--

Construction & Materials

Material Composition

- Panel: PC fireproofing plastic
- Backside: Transparent PC
- Terminals: Copper and phosphor copper

Logistics & Warranty

Warranty Period

10+ Years

Minimum Order Quantity

2000 pcs
