

Multi-Tiered Metal Trolley with Notched Supports

This metal trolley features multiple levels and notched vertical supports for organizing items. Equipped with wheels, it is designed for easy mobility in commercial and industrial environments.

Product Overview

Industrial Multi-Tiered Trolley

This robust multi-tiered metal trolley is engineered for efficient transport and organization in demanding commercial or industrial environments. Featuring a grated base and an adjustable secondary shelf, the unit utilizes specialized notched vertical supports to securely hold trays or components. Its mobile design and heavy-duty construction make it an ideal solution for streamlined logistics and workspace storage.
