

# Multi-Tool System for Garden Maintenance

This multi-tool system allows for various gardening tasks with interchangeable tool attachments. The tools are easily loaded and unloaded for efficient use.

## ADDITIONAL IMAGES

## Product Overview

### Versatile Garden Maintenance System

This multi-tool system is designed as a comprehensive solution for professional garden maintenance, featuring a single base engine unit compatible with a wide range of interchangeable attachments. The system allows users to seamlessly switch between tasks such as grass trimming, hedge trimming, tree pruning, edging, and soil cultivation. Engineered for efficiency and ease of use, it simplifies equipment management by consolidating multiple tools into one powerful, adaptable platform.

## Technical Features

### Key Components

- Smart starter for easy ignition
- Throttle cable for speed control
- Safety ignition switch
- Shoulder strap hanger
- Loop handle for maneuverability
- Air filter system

Telescopic Adjustment Range

100 cm
