Product Overview

High-Efficiency Multi-Tube Gas Burner

This multi-tube gas burner is engineered for consistent and reliable heating performance in commercial or residential water heating appliances. Featuring a durable metal alloy construction, it is designed to resist corrosion and ensure a long service life. The assembly includes a precision-engineered control valve for accurate flame adjustment and optimized fuel consumption, making it an ideal component for 6L and 10L water heaters.

Technical Specifications

Design Features

- Multi-tube configuration
- Evenly spaced flame ports
- Integrated mounting brackets
- Precision control valve with adjustment knob

Performance Highlights

6 L

Compatible Capacity

10 L

Compatible Capacity

Compatible Appliances

6L Water Heater, 10L Water Heater

Material Composition

Durable metal alloy
