

Multi-Unit Video Intercom System

This multi-unit video intercom system provides enhanced security for residential or commercial buildings. It integrates indoor monitors, outdoor stations with cameras, and electric door locks.

Overview

Professional Multi-Unit Intercom Solution

This video intercom system is designed specifically for multi-unit residential or commercial properties. It provides a reliable communication link between outdoor entry points and multiple indoor monitors, enhancing security and access control. The system integrates seamlessly with electric door locks and utilizes standard wiring protocols for straightforward installation.
