

Multi-Zone Refrigeration Unit

This refrigerator provides multi-zone temperature control for optimal food storage. It features a high-efficiency compressor and high-density foam insulation for energy efficiency.

Product Overview

Professional Multi-Zone Refrigeration Unit

This advanced refrigeration unit is engineered for superior energy efficiency and optimal food preservation. Featuring robust construction with precision steel pipe manufacturing and high-density foam insulation, it ensures consistent cooling performance. The unit offers dedicated management zones tailored for different food types, maintaining freshness from fruits to deep-frozen items.

Performance & Efficiency

Energy Efficiency

Level 1 Energy Efficiency

Core Technologies

High-Efficiency Compressor, Rapid Cooling, Overall Bending Technology, High-Density Foam Insulation

Temperature Zones

Food Management Zones

Storage Zone	Temperature Range
Fresh Fruits	3-6°C
Nutritious Foods	3-6°C
Deep Freezing	0-24°C
Fresh Fish	0-7°C

Design & Construction

Available Panel Finishes

- (Elegant White) Steel Glass
- (Champagne Gold) Steel Glass
- (Chinese Red) Steel Glass
- (Flash Silver) Steel Plate
