Product Overview

Versatile Multi-Function Power Solution

This industrial-grade unit integrates a diesel generator, a high-performance welder, and an air compressor into a single, compact, and mobile system. Engineered for professional construction sites and remote maintenance tasks, it provides reliable AC power, welding fabrication capabilities, and pneumatic air supply in one chassis. Built for durability and ease of use, it features an integrated alarm system and advanced voltage regulation to protect your valuable power tools and equipment.

Key Features

Performance Highlights

Diesel Powered, Multi-function 3-in-1, 100% Copper Alternator, Portable Design, Low Noise Operation

Technical Specifications

Safety Protections

- Automatic Voltage Regulation (AVR)
- Low oil level alarm system
- Short circuit protection
- Overload protection

Operating Frequency

50 Hz

AC Power Outlet

120V
