Overview

Professional Multifunction Spraying Solution

This high-performance multifunction spraying machine is engineered to pump, press, and spray a wide range of liquid and solvent-free materials. Designed for efficiency and reliability, it supports materials with grain sizes up to 3mm, including lime-cement render, reinforcement mortar, and dispersion paints. Its robust construction and integrated mobility features make it an essential tool for demanding professional construction and finishing projects.

Technical Specifications

Voltage	230V/50Hz
Motor Output	3200 W
Hopper Capacity	40 L
Max Grain Size	3 mm

Performance Metrics

Performance Metrics

13 L/min Max Delivery Rate	38 Kg Max Operating Pressure	15 M Max Delivery Height	45 M Max Delivery Radius

Applications

Compatible Materials

- Lime-cement render (<3mm)
- Adhesive mortar
- Reinforcement mortar
- Fine filler
- Finishing coat
- Dispersion paint
