

Multifunction Metalworking Shears

The multifunction metalworking shears is a versatile industrial machine for cutting, notching, and punching. It features a robust construction, a powerful motor, and interchangeable tooling for efficient and safe operation.

Overview

Versatile Industrial Performance

The QB-8 multifunction shears are designed for high-precision cutting, notching, and punching across various industrial materials. Built with a robust hydraulic system and a powerful motor, this machine ensures durability and consistent output in demanding fabrication environments. It features interchangeable tooling, allowing operators to switch seamlessly between different metalworking operations while maintaining high productivity and accuracy.

Standards & Compliance

Quality & Origin

Quality Guarantee • Made in China

Compliance Standards

GB/T 14404-2008

Operational Capabilities

Supported Operations

- Cutting
- Notching
- Punching

Technical Features

Key Components

- Powerful Motor
- Hydraulic System
- Interchangeable Tooling
