

Multifunction Spraying Machine

This multi-function spraying machine is designed for a variety of spraying applications. It features adjustable controls for flow rate and pressure, ensuring precise and consistent results.

Overview

Professional Spraying Performance

This multifunction spraying machine is engineered for high-efficiency application of liquid and pumpable materials. Featuring a powerful 3200W motor and a 30L hopper capacity, it is designed to handle demanding construction tasks with ease. Its robust, wheeled frame ensures excellent maneuverability on job sites, while adjustable controls provide the precision needed for consistent delivery of renders, mortars, and paints.

Performance Metrics

Delivery Capabilities

13 L/min

Max. Delivery Rate

15 M

Max. Delivery Height

45 M

Max. Delivery Radius

Operating Pressure

38 Kg

Technical Specifications

Power Requirements

Component	Specification
Motor Type	AC Brush Motor
Voltage	230V/50Hz
Motor Output	3200W
Air Compressor Power	1280W

Hopper Capacity 30 L

Maximum Grain Size 3 mm

Application Compatibility

Supported Materials

- Lime-cement render
- Adhesive and reinforcement mortar
- Fine filler
- Finishing coat
- Dispersion paint
