

Multifunction Wall Detector for Studs, Metal, and AC Wires

This multifunction wall detector is designed for locating studs, metal, and live AC wires behind walls. It features LED indicators, an ergonomic handle, and a compact design for easy storage.

Product Overview

Professional Multifunction Wall Detector

The JDT03 is a versatile wall detector engineered for precision in locating studs, metal objects, and live AC wires hidden behind walls. Designed for professionals in construction and electrical trades, its ergonomic handle ensures comfort during extended use, while the compact form factor allows for effortless portability. This reliable tool simplifies complex installation projects by providing clear, real-time feedback.

Technical Specifications

User Interface
