

Multifunction Woodworking Combination Machine

This multi-function woodworking machine integrates several operations into one unit, saving space and boosting efficiency. It features a table saw, jointer, and planer, along with precision adjustments for accurate results.

Overview

Versatile Woodworking Solution

This multifunction woodworking combination machine is designed to maximize workshop efficiency by integrating essential operations into a single, compact unit. It features robust capabilities for ripping, crosscutting, flattening, and thicknessing, making it an ideal choice for professional woodworkers looking to save space without sacrificing performance. Built with a sturdy frame and precision adjustments, this machine ensures consistent, high-quality results for a variety of woodworking projects.

Performance Metrics

Motor Power

2.2 kW

Max Power

3700 r/min

Max Spindle Speed

Technical Specifications

Working Table Dimensions	850-1000 x 210-350 mm
Max Planning Width	250 mm
Max Planning Depth	3 mm
Max Sawing Thickness	80 mm
Max Trimming Depth	10 mm
Saw Blade Diameter	250/315 mm

Physical Properties

Net Weight	200 kg
