

Multifunctional Electric Grill with Digital Display

This multifunctional electric grill provides versatile cooking options using adjustable time and temperature settings. Its non-stick surface ensures easy cleaning and even heat distribution.

Overview

Versatile Culinary Performance

This multifunctional electric grill is designed for professional and home kitchens, offering exceptional versatility with 180-degree opening capabilities for both flat and closed cooking orientations. Featuring independent temperature and time controls for each plate, it allows users to prepare diverse foods simultaneously. The unit includes a floating hinge system to ensure even cooking across various food thicknesses, from 15mm to 35mm.
