

Multifunctional Kitchen Blender with Heating

This versatile kitchen appliance is designed for making soups, smoothies and other blended recipes. It features a durable glass pitcher, a powerful motor, and a user-friendly control panel with pre-programmed settings.

Product Overview

Professional Multifunctional Blender

This powerful multifunctional kitchen appliance is designed to handle a wide range of culinary tasks, from processing raw ingredients to preparing warm soups. It seamlessly integrates the functions of a juicer, soybean milk maker, ice cream machine, and food processor into one sleek, durable unit. Featuring precise speed and time controls alongside pre-programmed settings, it offers consistent results for both home and professional kitchen environments.
