

Multifunctional Kitchen Faucet with Optional Sparkling Water Dispenser

This kitchen faucet offers multiple functions in one appliance. It can be paired with an optional sparkling water dispenser and a heating unit.

Overview

Multifunctional Kitchen Solution

This advanced kitchen system provides instant access to boiling water, cold water, and warm water through a single, space-saving 3-in-1 tap. Designed for efficiency and convenience, it features an optional sparkling water module to reduce plastic waste while delivering refreshing beverages on demand. With safety-focused engineering and a streamlined design, this system is an ideal upgrade for modern, eco-conscious kitchens.

Key Features

Core Functionality

- 100°C boiling water on demand
- Optional sparkling water dispenser
- Water and energy saving technology
- Streamlined and minimalistic design
- Failsafe child lock mechanism

Performance Metrics

Performance

100 °C

Max Temperature

2200 W

Nominal Capacity

5 L

Boiler Volume

0.8 MPa

Operating Pressure

Technical Details

Electrical Requirements

Parameter	Specification
Supply Voltage	1/N/PE 230 V
Frequency	50/60 Hz
Cable Size	3 x 1.5 mm ²
Protection Class	I
Type of Protection	IP24

Unit Dimensions (HxWxD) 345 x 225 x 225 mm

Certifications CE, GS
