

Multifunctional Mobile Phone Accessory Kit

This mobile phone accessory kit combines a mobile phone carrier, speaker, rechargeable battery, and hands-free function into one. It is powered by a 12V car cigarette lighter and allows users to answer calls and use an external earphone for discreet communication.

Product Overview

All-in-One Mobile Solution

This multifunctional mobile phone accessory kit integrates four essential functions into one compact device, including a mobile phone carrier, speaker, and rechargeable power source. Designed for convenient in-vehicle use, it operates via a standard 12V car cigarette lighter. It prioritizes driver safety and privacy by supporting hands-free calling and offering an external earphone option for secure conversations.
