

Multifunctional Portable Air Conditioner with Dehumidifier

This portable air conditioner provides cooling, dehumidifying, and fan functions. It features a digital display with adjustable temperature settings, multiple fan speeds, a programmable timer, rolling casters, and a window venting kit.

Overview

Versatile Climate Control Solution

This multifunctional portable air conditioner offers a comprehensive solution for cooling and dehumidification needs. Designed with efficiency and mobility in mind, the unit features a slimline, compact form factor that maximizes container loading capacity. With self-evaporative technology and no complex installation required, it provides immediate climate control for professional and residential environments.

Performance

Cooling Capacity

12000 BTU
Standard Capacity

14000 BTU
Optional Capacity

Minimum Thermostat Setting

16 °C

Core Functions

Cooling, Heating (Optional), Dehumidifier, Fan Mode

Technical Specs

Refrigerant

R410A • R290 (F-gas Quota free)

Timer

24 hours start/stop timer

Design & Usability

Mobility

Yes

Connectivity

Smart WiFi app option

Installation Requirements

No installation required
