

Multifunctional Stainless Steel Utility Knife with LED

This multifunctional utility knife features a durable stainless steel handle and a quick-change blade button. It includes an SK5 carbon steel blade, a standard knife blade, a saw blade, a bits holder, and an integrated LED light.

Product Overview

Professional Multifunctional Utility Knife

This durable multifunctional utility knife is crafted from premium stainless steel, designed to handle a wide range of cutting and maintenance tasks. It features an integrated LED light for operation in low-visibility environments, making it an essential tool for professional site work. With a versatile array of built-in components including a saw, interchangeable bits, and measurement scales, it offers maximum utility in a compact design.
