

Multifunctional Submersible Water Pump

This submersible pump is compact and easy to conceal. It is designed for multifunctional applications, offering power and energy savings while operating quietly in both freshwater and seawater.

Overview

Versatile Submersible Solution

The CHJ series is a multifunctional submersible water pump designed for efficient water circulation, drainage, and irrigation. Engineered with a high-efficiency motor and a durable impeller, it ensures consistent flow and optimal energy consumption across various environments such as ponds and aquariums. Its compact, robust construction allows for easy installation and reliable performance in demanding B2B water management applications.

Technical Specifications

Model Performance Comparison

Model	Power (W)	Flow Rate (L/h)	Head (m)	Weight (kg)
CHJ-500	6	500	0.9	0.25
CHJ-600	8	600	1.3	0.34
CHJ-900	16	900	1.5	0.45
CHJ-1500	25	1500	1.8	0.6
CHJ-2000	35	2000	2	0.85
CHJ-2500	45	2500	2.7	1
CHJ-3000	55	3000	3	1.2
CHJ-4500	65	4500	3.5	1.85
CHJ-5000	80	5000	3.8	1.85
CHJ-6000	100	6000	4	2.15

Flow Rate Range

500 L/h Min Flow	6000 L/h Max Flow
----------------------------	-----------------------------

Power Supply

AC 220-240V / 50Hz

Design & Build

Core Features

- High-efficiency motor for energy savings
- Durable impeller design for consistent flow
- Compact housing for easy installation
- Submersible operation capability
- Multi-caliber outlet compatibility

Key Applications

Water Drainage, Irrigation, Water Circulation, Ponds, Aquariums

Physical Dimensions

Available Outlet Sizes

3/8" • 1/2" • 3/4" • 1" • 5/4"
