

## Multifunctional Wheel Skid Steer Loader

This multifunctional wheel skid steer loader features a small, flexible body and high passability. It can operate in extreme conditions and can be hoisted to the top of buildings with a crane.

### ADDITIONAL IMAGES

### Overview

A compact and versatile wheel type skid steer loader designed for efficient material handling.

### Compact and Versatile Performance

This multifunctional wheel skid steer loader is engineered for high maneuverability and efficiency in demanding work environments. With a compact fuselage, it easily navigates tight spaces and is light enough for crane hoisting to elevated work sites. Designed for reliability, this machine delivers consistent performance across construction, landscaping, and agricultural applications.

## Performance Metrics

Equipped with a robust hydraulic system and quick-attach bucket for various construction tasks.

### Load Capacity

**750 kg**

Load

**1653.5 lb**

## Engine & Power

### Engine Configuration

Feature	Detail
Engine Model	498BPG
Type	Four cylinder, water cooling, four stroke
Rotating Speed	2500 r/min
Power Output	45 kW (60 HP)

## Technical Specifications

The operator cabin is designed for comfort and safety, offering excellent visibility.

### Operational Data

- Travel Speed: 12 km/h (7.5 mile/h)
- Tire Size: 10-16.5
- Hydraulic Pump Flow (Working): 65 L/min
- Fuel Tank Capacity: 88 L (19.36 UK gal)

### Hydraulic System Components

High Torque Motor (398cc), Tandem Plunger Pump (44cc)
