

Multifunctional Woodworking Combination Machine

This multifunctional machine combines several essential woodworking functions into a single unit, optimizing workspace. It offers capabilities such as sawing, planing, jointing, and routing.

Overview

A versatile unit capable of planing, jointing, routing, sawing, and slotting.

Space-saving design ideal for professional workshops and serious hobbyists.

Versatile Woodworking Solution

This multifunctional combination machine is designed to optimize workspace by integrating several essential woodworking functions into a single, robust unit. It offers professional-grade capabilities for sawing, planing, jointing, and routing, making it an ideal choice for small to medium-sized workshops. Engineered for precision and stability, this machine ensures accurate results across various wood processing tasks while maintaining a focus on user safety and efficiency.

Model Number	HH394
Core Functions	Sawing, Planing, Jointing, Routing, Milling, Drilling, Slotting

Sawing Capabilities

Engineered with adjustable fences and safety guards for precision and protection.

Sawing Performance

2200 mm

Max Cross-cut Width

880 mm

Rip Fence Cut Width

90 mm

Max Cut Height

Saw Blade Diameter	305 mm
Blade Tilt Range	0° to 45°
Cut Height at 45°	45 mm

Planing & Thicknessing

Thicknessing Range	6mm to 240mm
--------------------	--------------

Spindle & Milling

Spindle Speed Options

- 1750
- 3500
- 6700

Spindle Specifications

Parameter	Value
Spindle Diameter	30 mm
Useful Length	85 mm
Max Drilling Diameter	16 mm

Technical Specifications

Dust Hood Suction Diameters

Operation	Hood Diameter
Planing/Thicknessing	120 mm
Sawing/Milling	100 mm

Packing Size

- 2150 * 1560 * 1050 mm
- 2700 * 350 * 220 mm

Total Motor Power	3.0 + 2.2 * 2 kw
Net Weight	780 kgs
