

Multimedia Equipment Enclosure

This multimedia equipment enclosure is designed for organizing various multimedia devices. It features a clean, minimalist aesthetic with rounded edges and ventilation.

Product Overview

Professional Multimedia Enclosure

This high-quality multimedia equipment enclosure is designed for both communication projects and household decoration. Featuring a spacious interior with a reasonable layout, it ensures efficient organization of your networking and media equipment. The enclosure is constructed from flame-retardant material and includes integrated ventilation to maintain optimal operating temperatures while allowing wireless signals to pass through effectively.

Technical Specifications

Design Features

- Temperature-dissipating holes
- Compact door mechanism
- Wireless signal friendly
- Large internal capacity

Material Characteristics	Flame Retardant, Heat Dissipating
Ventilation	Yes

Logistics & Packaging

Quantity per Carton	10 pcs
