

Multimedia Speaker System with Subwoofer

This multimedia sound system features a central subwoofer unit with integrated controls, accompanied by two satellite speakers. The subwoofer incorporates a bass reflex port for enhanced low-frequency response.

Overview

Immersive Multimedia Audio

This compact multimedia speaker system is designed to deliver a balanced and clear audio experience for a variety of applications. Featuring a dedicated central subwoofer with a bass reflex port, the system ensures enhanced low-frequency response for deeper sound. The included satellite speakers provide crisp mid and high frequencies, while the remote control offers convenient operation for the user.
