

# Multiple Cylinder Hydraulic Cone Crusher

This cone crusher is a new generation of multi-cylinder hydraulic cone crushers with high efficiency. It offers several outstanding features that enable customers to fulfill their crushing needs.

## Product Overview

### HPT Series Multiple Cylinder Hydraulic Cone Crusher

The HPT series represents a new generation of high-efficiency cone crushers, engineered with over 30 years of research and development. Designed specifically for demanding mining and aggregate processing applications, this machine excels in secondary and tertiary crushing stages. Its advanced multi-cylinder hydraulic system ensures high crushing force, consistent performance, and precise control over the final product size and shape.

## Key Features

### Advanced Features

- Integrated lubrication system
- Automatic control system
- Laminating crushing technology for superior cubical shapes
- Multiple crushing cavities for versatile production applications

## Application Suitability

### Suitable Applications

Mining, Aggregate Processing, Secondary Crushing, Tertiary Crushing

## Performance

### R&D Experience

**30 +**

Years of R&D
