

Multistage Centrifugal Pressure Pump

This horizontal multistage centrifugal pump is designed for high-pressure applications. It features robust construction with flanged connections and a base mount for stability, making it suitable for industrial fluid transfer and pressure boosting systems.

Product Overview

Industrial Multistage Centrifugal Pump

This horizontal multistage centrifugal pump is engineered for demanding industrial fluid transfer and pressure-boosting applications. Built with robust materials and flanged connections, it offers high stability and consistent performance under pressure. The multistage design ensures efficient operation across various high-pressure system requirements.

Performance Metrics

Pump Type	Horizontal Multistage Centrifugal
Key Features	High-Pressure Capable, Horizontal Design, Flanged Connections, Industrial Grade

Technical Specifications

Mounting Type	Base mount
Connection Type	Flanged

Applications

Primary Applications

- Industrial fluid transfer
- Pressure boosting systems
