

# Multistage Centrifugal Water Pump

This multistage centrifugal pump is designed for water pumping applications. It features a two-pole induction motor, Class B insulation, and IP44 protection.

## Overview

### Multistage Centrifugal Water Pump

This multistage centrifugal pump is engineered for reliability and high performance in clean water applications, even in scenarios where air may be present. Designed for quiet operation and low energy consumption, it is an ideal solution for domestic and civil water pressurization, distribution, and irrigation systems. The robust construction ensures long-term durability, making it suitable for installation in enclosed or sheltered environments.

## Key Features

### Key Benefits

- Handles clean water with air presence
- Quiet and reliable operation
- Low energy consumption design
- Corrosion-resistant materials

## Applications

### Recommended Applications

Domestic Pressurization, Civil Water Distribution, Rain Water Recovery, Irrigation Systems

## Installation

### Installation Environment

Enclosed Environment • Sheltered from Weather
