Product Overview

High-Efficiency Multistage Pump Solution

This vertical multistage centrifugal water pump is engineered for reliable performance in industrial, agricultural, and domestic applications. Constructed from high-quality stainless steel and cast iron, it offers excellent durability and corrosion resistance for clean, non-corrosive liquids. The system includes integrated control units and pressure tanks to ensure consistent water delivery while providing automatic protection against dry running and overpressure.

Key Features

Advantages

- Automatic start/stop functionality
- Dry-running protection
- Overpressure safety monitoring
- Durable stainless steel construction
- Stable pressure delivery via integrated tank

Technical Specifications

Materials	Stainless Steel, Cast Iron
Applications	Water Supply, Pressure Boosting, Industrial Liquid Transfer, Irrigation, Drainage
