

# Multistage Centrifugal Water Pump

This multistage centrifugal pump is designed for efficient water pressure boosting in various applications. It features a TEFC motor, mechanical seal, and compact design suitable for clean water environments.

## Product Overview

### Multistage Centrifugal Water Pump

This multistage centrifugal pump is engineered for reliable performance in clean water applications, even in the presence of air. Designed for quiet operation and low energy consumption, it is an ideal solution for domestic and civil water pressurization, distribution systems, and irrigation. Its robust construction ensures longevity, making it suitable for continuous operation in sheltered environments.

## Technical Specifications

### Key Materials

- Stainless steel components
- Cast iron components

### Key Features

TEFC Motor • Mechanical Seal • Quiet Operation • Compact Footprint

### Compatible Liquids

Clean water, Non-chemically aggressive liquids

## Application & Usage

### Recommended Applications

- Domestic water pressurisation
- Civil water distribution
- Pressure sets
- Rain water recovery
- Irrigation systems

### Installation Requirements

Must be installed in an enclosed environment or sheltered from inclement weather.
