

Multistage Submersible Water Pump

This submersible pump is designed for use with clean water that does not contain abrasive particles. It is reliable and easy to use, making it suitable for domestic, gardening, irrigation, and tank emptying applications.

Product Overview

Multistage Submersible Water Pump

This multistage submersible pump offers a robust and efficient solution for demanding water pumping tasks, including dewatering, irrigation, and water transfer. Designed for versatility, it features a durable construction using stainless steel and corrosion-resistant polymers for a long service life. The integrated float switch ensures automatic operation based on water levels, preventing dry running and optimizing efficiency for both residential and industrial applications.

Motor Specifications

Rotation Speed

2900 r/min

Speed

Insulation Class

Class B

Protection Rating

IP68

Motor Type

Two-pole induction motor

Service Duty

Continuous service S1

Electrical Data

Power Supply

220V, 50Hz, 60Hz (on request)

Thermal Protection

Yes

Features

Key Features

- Multistage design for high pressure and flow
- Automatic float switch for dry-run protection
- Corrosion-resistant construction
- Compact footprint for easy installation
