

Mushroom Anchor with Galvanized/PVC Coating

This mushroom anchor is available with either a galvanized or PVC coating. It features a disc-shaped base with a central, conical spike for secure anchoring.

Product Overview

Heavy-Duty Mushroom Anchor

This mushroom anchor is designed for reliable and secure anchoring in various marine and outdoor applications. Featuring a disc-shaped base with a central, conical spike, it provides excellent holding power in soft bottoms. Available with either galvanized or PVC coating, this anchor is engineered for superior corrosion resistance and long-term durability in harsh environments.

Technical Specifications

Design Features

- Disc-shaped base for stability
